PLOWING FORWARD

KAGE QUALITY GUARANTEE

When you purchase a KAGE product, we want you to be confident you're buying the best equipment possible. We back our products with a 15-day trial guarantee. From the date of delivery, you have 15 days to try out the product and if you're not satisfied, you can return it - no questions asked. KAGE will reimburse 100% of the purchase & shipping costs.*

BUILDING IT BETTER

If the idea isn't revolutionary or innovative as our company name states, we're not taking the idea far enough. KAGE Innovation invents and manufactures equipment for the professional grounds manager. Our core objective is to offer new products as solutions to common industry setbacks. In short, we're always on the lookout for "the better way."

WHAT'S IMPORTANT

Our customers and employees.

KAGE Innovation is run by people, and we serve people. The company was started because of an opportunity that was seized. KAGE Innovation continues to create opportunities for people - both customers and employees alike.

DRIVING NEW IDEAS TO THE INDUSTRY

Have you ever thought, "There just has to be a better way!" Applying our Experience Driven Innovation to conquer those ideas is what we do. Every week new ideas are hashed out and the ones that make it earn the KAGE stamp for excellence in design.

As our business has flourished, our mindset has not changed. It is still much like when I started out tinkering in my dad's workshop. Persevering until we find the better way, and designing with the end-user in mind. As we grow and the number of KAGE employees grow, our collective vision can be summed up in one sentence; "We want to make it easy for you".

Ours is a timeless industry. Timeless because there has, and always will be, grass to mow and snow to push. The caveat is that time is of the essence. In this industry the only variable is time, and we all need more of it. Time is expensive, and as labor costs increase we're pushed to work smarter and faster. It's this void where we seek to make the difference.

"Whatever you do, work heartily, as for the Lord and not for men"
- Colossians 3:23

Mike Stephan
PRESIDENT & FOUNDER

* The money back guarantee reimburses 100% of the purchase & shipping costs. However, all return shipping and shipping arrangements are the responsibilities of the original purchaser.

SNOWFIRE/SKIDSTEER

SNOW PLOW SYSTEM PATENT PROTECTED

THE BLADE

- >Plow structure like no other in its class with an attack angle of 65 degrees
- >Moldboard sheet itself is built with 10-gauge GRADE 50 steel to extend the life of the plow
- >Blade features a standard 8" safety trip-edge that prevents accidental damage when encountering hidden obstacles by tripping back 68 degrees

THE BOX

- >Bullet proof structure that conquers the destructive tendencies of any snow removal operation
- >Self-adjusting, flexible polyurethane skids. They have the ability to slide upwards as the cutting edge of the plow becomes worn, allowing it to cleanly scrape the plowing surface
- >10" wide snow catches to prevent spillage while pushing

UNIVERSAL SKIDSTEER MOUNT

The Universal Skidsteer Mount is the standard for the SnowFire System. This couples to any modern skidsteer in seconds. Then, just couple the hydraulic couplers to the machine auxiliary hydraulic and you are ready to roll snow!

FROM BOX TO BLADE IN SECONDS

The SnowKage Box hooks onto a skidsteer snow plow to instantly create a revolutionary containment system. This is done in seconds without leaving the cab – no pins, bolts or hinges.

Attaching & detaching the box can take less than 5 seconds for a skilled operator to do.

BULLET PROOF STRUCTURE

See Specifications
on Page 31

SNOWFIRE/COMPACTS

SNOW PLOW SYSTEM PATENT PROTECTED

MULTIPLE CARRIER ATTACHMENTS

This system can incorporate many different styles of hook-and-pin style attachments OR universal skidsteer attachments. See attachment options in back of brochure.

FLOATING TOP LINK

Uniquely designed for compact wheel loader applications, this attachment allows the plow to float while driving over uneven terrain. This hitch style is recommended for all wheel loader applications because it increases the ability to steer the loader, and the scraping ability of the plow. For available Quick Attaches see our specification tab.

SNOW PUSHER CAM LOCK

The simple and sturdy way to attach the SnowKage to the blade from inside your skidsteer cab is by using the cam locks. Raise the boom up and tilt the plow down behind the hooks of the SnowKage, align the cam lock brackets on the blade with the receptor hooks of the SnowKage and raise the boom.... then back to work! This is done in about 5 seconds. Back and forth from plowing to pushing.

THE PAYOFF

Reduce plow time by 25% to 50%

Advantages of a snow plow and a pusher box combining them into one fast and seamless operation

Windrow or back drag with the plow normally, then grab the box to push out their piles or windrows

SNOWSTORM

SNOW PLOW SYSTEM PATENT PROTECTED

BOLT-ON UNDERCARRIAGE KITS FOR TRACTORS

Everyone knows tractors are versatile, and fuel efficient machines. Combined with a SnowStorm series plow system, tractors can be far more useful for your business year round. Each undercarriage kit comes with an owners manual to help you mount the unit in short time.

CONSTRUCTED WITH HIGH GRADE STEEL

The SnowStorm blade is designed specifically to take the abuse from mid-sized wheel loaders, backhoe loaders, tele-handlers and agricultural tractors. The link, the blade and SnowKage mate perfectly creating the ultimate snow containment tool. The hydro-lock brackets of the blade latch onto the bars of the box. Controls in the cab allow the operator to remain in the cab until the job is done.

THE BLADE

The SnowStorm blade cuts clear down to the plowing surface with the aid of an oscillating mount. The blade also comes with a standard trip-edge which is backed up with 8 compression springs and a tri-formed box.

THE BOX

Tough, triangulated supports mean that you can push this to the extreme with no breakdowns. On both sides of the box are 2-inch poly skids designed to go easy on curbs. The box width manually adjusts from 10 feet out to 14 feet.

BUILT TO LAST

SHADOWBLADE

PATENT PROTECTED

OPTIONAL LASER GUIDANCE

The optional laser guidance reminds the operator when the ShadowBlade is deployed off to either side.

3-POINT SNOW ATTACK

We're building our reputation on being an innovator for the snow-removal industry. The ShadowBlade is a patented 3-point rear attachment design. This new weapon will set your tractor up to be a worthwhile year-round investment.

SIMPLE JOYSTICK CONTROL

Simple joystick control eases the operators ability to control both front and rear plow systems.

HYDRAULIC VALVE CIRCUIT

Located at the rear of the tractor up high for easy access, the hydraulic valve circuit, stays clear of compacted snow.

MOVE MOUNTAINS

SNOWDOZER

SNOW PLOW SYSTEM PATENT PROTECTED

BLADE AND BOX ONE SLICK COMBO

It is designed for Loaders 30,000 - 55,000 pounds. Big jobs need a big plow and KAGE's SnowDozer goes to 20', Blade and Box. The two-in-one blade and box combo quickly becomes the favorite and most productive part of your snow removal fleet.

HYDRAULIC LATCH PINS TO SECURE BOX

The SNOWDOZER plow system offers unrivaled intuition and simplicity.

1 INCH BOLTS SECURE SECTIONS

Custom build to the width of your choice with 36 and 24 inch sections.

HEAVY DUTY TRIP SPRINGS

These heavy duty springs keep your blade on the ground meaning fewer passes and saved time.

TRIP EDGES

Every feature of the SNOWDOZER is overbuilt and tested by snow removal professionals with years of experience in the field.

GO FROM ANGLE PLOWING TO SNOW PUSHING IN SECONDS

Unlike wing plows, this patented System is simple and robust with fewer moving components.

TWO IN ONE BLADE +

TRACTOR MOUNTS

BOLT-ON UNDERCARRIAGES

REVOLUTIONARY DESIGN

Let's have a conversation about the fuel efficiency of a tractor, the maneuverability of a tractor, the comforts of a tractor cab, and the superior traction and power of a tractor.

Then let's talk about mounting the world's best plow on the front of that tractor. Now that's something worth talking about! KAGE has harnessed the versatility of using a tractor for snow plowing by designing a bolt-on undercarriage mount for their signature plow systems. Our tractor mounts are built to handle the rigors of massive snow removal.

MORE VISIBILITY

With the low profile attachment of the KAGE Plow System and the undercarriage, the tractor and plow are more maneuverable and visibility is vastly improved over the use of loader arms.

FLOAT MODE

Maintain full down pressure while still easily plowing over contoured surfaces with the float mode.

KAGE TOUGH

See Specifications
on Page 36

HORSEPOWER'S NOT THE ISSUE

We've done the side by side tests and there's no comparison in performance between conventional skidsteer tires and the KageKlawz. Even in a downward sloped drive, the results were obvious - the traction of the KageKlawz proved to be the game changer for skidsteer snow removal. You have all the power you need, now just put it to use.

RADIAL VS BIAS TECHNOLOGY

MICHELIN® XM+S4 Pre-mold Retread Tires are the best performing snow tire tread on the market. They come with a Tread-Life Warranty* serviceable at any Michelin Retread dealer near you which will minimize down time — and with retreads, you may never need to buy a set of replacement tires again.

*Michelin Pre-mold Retread Tires are warrantied for the life of the tire, or down to 2/32 which is the legal limit. Search on-line for a certified Michelin retread tire dealer near you.

MICHELIN XM+S4 RETREADS

These tires allow the machine to transfer more power to the ground and absorb more shock from uneven surfaces.

PROTECTED VALVE SYSTEM

Wheels come standard with a welded valve protector.

LESS SPIN, MORE DRIVE

LIQUIDRAGE ANTI-ICING SPRAY TECHNOLOGY

TOP 10 REASONS TO USE LIQUID ICE CONTROL

1. Liquid products are better for turf, soil, and ground water
2. Liquids do not bounce off your target coverage area
3. Liquid anti-ice applications do not 'plow off'
4. Liquids almost completely eliminate tracking into buildings and reduce corrosion and build up
5. Liquid anti-icing applications prevent ice bonding to the pavement
6. Liquids are easier to pump than dry salt is to scoop
7. Liquid blended products include corrosion inhibitors which lengthens equipment life
8. It takes 10x more resources to post de-ice than pretreat with liquid
9. Dry salt stops working at 10-15 degrees F
10. It takes 20 minutes for dry salt to start working at 25 degrees F

ADVANTAGES AND FEATURES

Anti-Icing liquids are becoming all the rage. Use fewer solids to get the job done, and provide your customers with top-notch service.

The LiquidRage enables you to apply brine and other chemicals from your skidsteer or tractor, without the need to buy expensive adapters and other equipment.

Features:

Adaptable to skidsteers and ag tractors (universal skidsteer attachment, CAT II 3-Point Hitch attachment)

- >Fully enclosed design protects critical components
- >150 gallon capacity
- >Up to 10' spray width

REEL KIT

By installing the hand hose reel kit, you add the ability to apply both summer and winter designed product to a precise location, up to 50' away from where the tractor is parked with the Liquid Rage.

LESS ICE, CLEANER SURFACE

Check out **LiquidRage Summer Kit** on page 44

ADVANTEDGE FLEX CUTTING EDGE SYSTEM

FRONT AND WING BLADE FLEX EDGE SYSTEM

Until now, sectional plows and cutting edges have only been available on a few brands of plows. The AdvantEdge™ makes it possible to harness sectional cutting edge technology on almost any plow or pusher available on the market today!

REDUCES DAMAGE TO PLOWED SURFACES

The AdvantEdge reduces the damage to curbs, asphalt/concrete transitions all while scraping better!

Each 18" or 24" cutting edge section comes standard with Hardox™ wear-plate, or an optional Carbide cutting edge.

AUTOMATICALLY NAVIGATES PEAKS AND DEPRESSIONS

No pavement is perfectly flat, so unless your cutting edge is flexible, you're leaving snow behind. The independent cutting edge sections of the AdvantEdge help the blade to contour to the shape of any surface. The more snow you can remove during your plowing operations, the less salt and sand usage you'll have.

PRESSURE ADJUSTABLE ENCAPSULATED DESIGN

This patented design gives you the flexibility to adjust the pressure on each section so you can obtain just the right amount of preload. Each section is equipped with multiple 120 lb/inch die springs. AdvantEdge uses a closed face design reducing the impact that salt, sand, and ice can have. Each section is completely covered by the cutting edge, which is easily replaced by removing two bolts.

WHEELKADDY COMMERCIAL MOWER SULKY

250 SERIES

Simple and durable. The economic model that gives you the lowest maintenance sulky ever.

SULKY

We designed the KAGE WheelKaddy with two things in mind: Increased life expectancy, and reduced down time. That is why this sulky utilizes automotive-grade components, such as tapered roller bearings, drive-train (PTO) pivot yokes, and a grade 50 steel platform. Experience less down time plus a more comfortable ride because of our designed-by-the-user approach!

500 SERIES

The original. Simple, yet packed with features and as durable as they come! The 500 series features a very smooth ride with the unique suspension.

360 SERIES

The 360 series swings 360 degrees for backing up without damaging turf. This model features suspension, longevity, and full 360 degree range of motion.

GreatER BAR

GREATER BAR SYSTEM PATENT PROTECTED

Ground Breaking Design

Grading Bars and Land Planes are commonly used to make ground more suitable for drainage, sports, landscape features and turfgrass preparation. Grading Bars are the fastest and easiest way to cut high spots down and fill small depressions. Many Graders also include a row of ripper (scarifier) teeth. In the past they have been lowered manually by the operator climbing outside the cab, or hydraulically.

SPRING LOADED RIPPER BAR

The KAGE GreatER Bar makes it easy for the operator and removes the potential of hydraulic failure or problems by using a mechanically activated Quick Rip Bar.

REPLACEABLE BOLT-ON CUTTING EDGE

Overbuilt by design to give you the most return on your investment.

HEAVY DUTY CORNER GUSSETS

Key mechanical pieces are built from HARDOX™ steel which provides longer wear life and more durability.

QUICK RIP TEETH

Operators will also benefit from teeth that retract automatically when moving backwards and bucket hooks that allow the operator to carry a bucket from job to job.

We make it easy...

No Manual or Hydraulic Ripper Teeth

SNOW MANAGEMENT

SNOW STAKE SYSTEM

STAY ON TRACK ALL SEASON

KAGE developed this Pounder & Quiver Kit to address the shortcomings of conventional snow stakes. The KAGE Pounder punches a perfect hole for the marker stake. The 3 lb. slide hammer can punch through the toughest soils and even road base gravel.

The Quiver features high-quality nylon material and carries 120 stakes up to 36" long. Strap the quiver to your leg and waist or your back like a traditional quiver, using the two 2" wide straps and industrial strength buckles.

Our Snow Plow Stakes are made of a durable polymer blend which readily rebounds after impact, even in sub-zero temperatures. Available in 26", 32" and 36" lengths.

Replacement tips are available.

BUDDYSTRAP

MINIMIZE BACK STRAIN

The BuddyStrap includes many features that make what was previously a chore, fun! A major benefit of the strap is that it's universal, so you can enhance any D-handled snow shovel in 5 minutes, saving you time, money, and back strain.

Simply attach the strap to the shovel and you can sling it over your shoulder for hands-free carrying. For high-speed commercial applications, the one-handed on and off design allows for easy access.

The strap does not interfere with stacking or storage, so when it's time to put your shovel away, you can do so with ease. The durable seatbelt material resists damage and abuse, and with reinforced stitching and grommets, the heavy duty strap won't tear or weather.

A TOOL FOR ANY JOB

POLY ROTOR PADDLES

KICK MORE SNOW... LONGER

Single-stage snow blowers are a crucial part of your snow removal business. It's hard enough to keep them maintained without the frequent paddle and scraper bar replacement due to normal wear. Compared to rubber paddles, Poly Rotor Blades last up to 4 times longer, produce a cleaner wear edge and sell for the same price.

Keeps its edge as it wears, cutting down to the pavement and cleaning more efficiently.

SNOWBLAZE SHOVEL

CLEAR SNOW MORE EFFICIENTLY

The SnowBlaze revolutionizes the way that commercial contractors and home-owners alike are able to remove mass quantities of snow. Clearing long stretches of sidewalk, or even driveways is easiest if you can 'windrow' the snow. By 'plowing' the snow to one side while pushing it forward, you are displacing the snow in two directions, and containing the dribbles to one side. The flip-stick used for windrowing tucks up and out of the way when not in use and does not interfere with pushing, back-dragging, or lifting the snow.

Utilizes a steel cutting edge that is easily removable and replaceable. It is also supported by an aluminum backing bar to help keep the edge straight.

PLOW ACCESSORIES

CURB GUARD KIT

Optional curb guard kit helps reduce wear to the trip edge. Clean curb lines are crucial, but don't wear out your plow in the process! The curb guards are sold as a kit, and they are able to transpose so that you get double the wear.

POLYURETHANE CUTTING EDGE

The Polyurethane Cutting Edge is useful when plowing delicate surfaces such as decorative concrete and pavers, or seal-coating. In our experience, this proprietary blend of polyurethanes outlasts rubber, and even steel in some cases without damaging the plowing surface. The blade is 1 ½ inches thick, pre-drilled and the optional kit comes with a steel support strip and extra long carriage bolts for easy installation.

BACK DRAG KIT

The Back Drag Kit manufactured exclusively by KAGE Innovation is designed to fit any 6" to 8" snow plow cutting edge machine with a highway punch bolt hole pattern. It also works great with trip-edge plows and when you're angling snow away from curbs.

The entire kit weighs 10 pounds and it's built from the same uniquely blended polyurethane material used in our Poly Cutting Edges and Poly Skids. It's far more durable and will last considerably longer than rubber.

PLOW GUIDE

High visibility plow guides keep you on track during plow time and helps prevent landscape and curb damage. Easy to replace and universal to all KAGE plows.

WE FIT YOUR NEED

CUTTING EDGE LIFE EXTENDERS

Add these carbide edge extenders at the ends, and center of the plow to increase the life expectancy of your cutting edges. These are sold in kits including the carbide embedded edge, and two bolts and locknuts to replace the existing hardware. Order up to 4 per SnowStorm plow, and 2-4 per SnowFire plow.

FLOATING CAM LOCK BRACKETS

These will provide the box another 3" of vertical and rearward travel to assist the Poly Skids and SnowKage to be independent of the Blade. In combination with the Floating Skids, this will allow the operator to clean neatly right up to the curb, pushing the snow over while allowing the snow plow cutting edge to do the work of digging the last ounce of snow from the base of the curb. (Not designed to overcome curbs over 8" tall).

FLOATING POLY SKID

The heel of the poly skid is allowed to move up and down 3" independent of the moldboard or side panel. This allows even pressure against the plowing surface even while the AdvantEdge is contouring or flexing over the plowing surface. It also helps in conjunction with the Floating Cam Lock Brackets to clean directly up the curblines, without the need to remove the SnowKage Box.

WINGLINE™ LASER PLOW GUIDE

BUILT TO MAKE YOUR JOB EASY

Wing Plows are a great way to increase productivity by clearing more ground per pass. The problem is that many operators do not use the wing because they can't see it and worry about hitting cars, guardrails and mailboxes which lead to costly claims. The WINGLINE™ fixes this issue by showing the operator a clearly projected line on the ground so they know where their wing will be before they reach the object.

UNIVERSAL IN CAB SUCTION CUP MOUNT

The WINGLINE™ is the most versatile and highly visible laser on the market for snow removal applications. The in cab suction cup mount was designed for Municipal Plow Trucks but can be easily installed in anything with a windshield and a 12v power source. The Class IIIR laser is self contained, maintenance-free and provides a clearly projected line that operators can see.

HIGH VISIBILITY LINE

Allows you to keep your eyes on the road and in control of the vehicle. The WINGLINE™ instantly projects a line in front of the vehicle directing the operator where the trailing edge of the wing plow will be, seconds before it arrives. This not only reduces liability, but also reduces operator fatigue and neck strain.

REMOTE SWITCH

Alerts you when the wing is deployed increasing awareness to the operator. Using a simple IP67 switch mounted to the retract cylinder this system **turns on and off** with wing plow deployment so its nearly fail proof.

>>Turns on and off with activation of wing

DRAWING A LINE IN THE SNOW

COMPLETE KIT is easy to install in about 45 minutes and comes with everything needed to install. The kit can be powered by 12V accessory plugs or hardwired.

* Verify for all models. Ask your salesperson for more information

** Excludes Tier 4 engines

These measurements must be confirmed,
as the tractor's frame will be longer on some models.

SNOWDOZER SPECS

The KAGE SnowDozer is designed for large wheel loaders in the 30,000 – 50,000 lb weight range. With a 48" tall moldboard this fills a segment in the market that KAGE did not produce a good fit for.

SNOWDOZER SPECIFICATIONS					
	12 FOOT	14 FOOT	16 FOOT	18 FOOT	20 FOOT
ANGLE DEGREES	34	34	34	34	34
BLADE WEIGHT	4933	5016	5575	5658	5741
SYSTEM WEIGHT	7021	7104	7663	7746	7829
BLADE HEIGHT	48"	48"	48"	48"	48"

CUSTOM BUILD TO THE WIDTH OF YOUR CHOICE WITH 36 AND 24 INCH SECTIONS
12 FOOT UP TO 20 FEET

Angled System widths
12 Foot = 165 1/2
14 Foot = 185 3/8
16 Foot = 205 5/16
18 Foot = 225 1/4
20 Foot = 245 1/8

Angled Plow widths
12 Foot = 130
14 Foot = 150 1/16
16 Foot = 170
18 Foot = 189 7/8
20 Foot = 209 3/4

Full Angle 34.00 °

12 Foot = 152 3/4
14 Foot = 159 1/2
16 Foot = 166 1/8
18 Foot = 172 7/8
20 Foot = 179 1/2

12 Foot = 155 1/8
14 Foot = 179 1/8
16 Foot = 203 1/8
18 Foot = 227 1/8
20 Foot = 251 1/8

3" Hydraulic cylinders angle the Blade left and right, 34 degrees. The angle function works with and without the SnowKage Box attached, so not only can you windrow or 'plow' snow normally, but you can hog snow at an angle. This is especially helpful when you are swooping into corners, or clearing entrance loops.

BIG PLOW FOR BIG JOBS!

Below are the bolt patterns of the plate that will attach to your plow. The horizontal spacing is known as "standard highway punch". Two height options are available. Choose either SF or SS bolt placement for the AdvantEdge kit.

Cutting Edge bolt patterns are NOT standard highway punch bolt spacing

Other bolt patterns may be available, call Kage for assistance,

SF bolt placement

3' Segment

2' Segment (Not Highway Punch)

MOUNTING OPTIONS

SS Mounting Option

SF Mounting Option

Snow pushers equipped with the Kage AdvantEdge that require additional cutting edge length may be fitted with an extension kit. The kits attach over either an 18" or 24" cutting edge. They can extend the edge length from 0 to 4" closing any gaps between the edge and the pushers sides. Typically this is only required by pushers sized in foot and a half widths.

Item Number	Part Name	Part Number	Revision	Quantity
1	Edge Extension 18	SBCEE18	1	2

LIQUIDRAGE SUMMER KIT

LIQUIDRAGE

Description	PartID
Liquid Rage Sprayer Assembly	SSA150
Broadcast Nozzle Kit	BNK10
Hose Reel Kit	HRK50

The Liquid Rage features the patented hitch design which allows for easy adaptation between skid steer or tractor carriers. No adapter plate required. In fact, you can change from a skid steer to a tractor in less than 8 minutes! By installing the summer boom kit, you instantly convert your Liquid Rage into the perfect broadleaf or other IPM application tool!

Model / Option #	Description
GBT72	GreatER Bar w/ Quick Rip 72"
GBT84	GreatER Bar w/ Quick Rip 84"
GB72	GreatER Bar 72"
GB84	GreatER Bar 84"

Spring tubes should be visually checked for blockage before each use. Replace blades before wear in mounting angle begins

Default length for top link is 13". Lengthening or moving to the lower bolt hole will allow teeth deployment with less downward angle. However this will increase the pressure required to activate the teeth. Lighter machines may need to reduce the length of the top link.

Note Skid Steer door clearance

Tooth depth can be increased 1-1/2" by removing the plastic spacer.
